Breast Center at Marien Hospital Cancer Center - MHDCC Düsseldorf
Rochusstrasse 2
D-40479 Duesseldorf

Thesis/ doctoral degree in cardiac surgery, postgraduate training in general surgery and surgical gynecology followed by a teaching assignment at the University of Duesseldorf. Supplementary training at European and U.S.-American surgical sites in Stockholm and Atlanta in the domain of breast and reconstructive surgery. Invention (U.S. patent) and scientific development of a tissue expander in the field of breast reconstruction. More than 300 scientific publications dealing with oncological and reconstructive breast surgery. First conception of oncoplastic surgery in the 80-s
1990 founder of the Interdisciplinary Breast Center - IBC in Duesseldorf and assignment of adjunct professor at National Technical University (NTU) of Athens with main objectives upon oncoplastic surgery combined with non-ionizing methods in diagnosis and therapy of breast cancer, as well as upon biomedical techniques
Director of the Interdisciplinary Breast Center in Duesseldorf with certification according to EUSOMA and National guidelines. EUSOMA Executive Committee membership and member of EUSOMA/ UEMS breast surgeon working group, having defined standards for the training of breast surgeons. Coordinator of the European - EBCN fellowship program for training in surgical management of breast lesions. Participation in the European Cancer Network of Excellence and full membership in the international BreastCentersNetwork to support synergy among breast units.

2010 new working place, appointed Director of the Department of Senology and Breast Surgery at Marien Hospital Duesseldorf Cancer Center (MHDCC) Rochusstrasse 2, D-40479 Duesseldorf, teaching facility of the Heinrich-Heine-University. Our comprehensive forward-looking concept in cooperation with the Department of Radiotherapy, the Department of Oncology, the Screening Network and the practitioners of the region works successfully. We offer service and training for benign and malignant breast diseases, breast changes in female and male patients without any restriction of the surgical methods including all oncoplastic and aesthetic procedures as well as ultrasound for breast surgeons and IOERT with the latest version of the MOBETRON.

The International Fellowship in Breast Surgery according to the EUSOMA guidelines has been launched successfully. The surgical concept and cross training is open to breast specialists and trainees holding a current license to practice as, general surgeon, plastic surgeon or gynecologist. The fellowship prepares for the EBSQ exams for Breast surgeons organized by UEMS according to EUSOMA documents on "The Training of Specialized Health Professionals dealing with breast cancer".
